About the List

Below is a list of devices designed to prevent percutaneous injuries and exposures to bloodborne pathogens in the health care setting. The list is updated regularly with new products. It is intended to help health care facilities in their efforts to reduce sharps injuries and comply with OSHA's revised bloodborne pathogens standard.

This list is not intended to be exhaustive and does not necessarily represent all such devices currently on the market. **The International Healthcare Worker Safety Center does not conduct product evaluations, and inclusion on this list is not, and should not be interpreted as, an endorsement by the Center.** We welcome information about, and samples of, new products designed to prevent bloodborne pathogen exposures. Send product information to: **Safety Device List, International Healthcare Worker Safety Center, University of Virginia, P.O. Box 800764, Charlottesville, VA 22908-0764.** For more information, call (434) 924-5159.

New products enter the market regularly, and the manufacturers and distributors of products change frequently. Many companies have several products that may not all be listed. Companies should be contacted for complete product information.

The list is organized by type of product. Under each product type, the manufacturers and the specific product names are listed. A

company directory can be found at the end of the list, with phone numbers and links to company websites.

Injection Devices:

Used for intramuscular and subcutaneous injections and includes disposable syringes (syringe and needle), needles with needle guards for attachment to syringes, needleless jet injection systems, and pre-filled syringes.

(A) Hypodermic Needles and Syringes (sliding sheath/sleeve; needle guards)

- BD Eclipse™ Injection Needle
Becton Dickinson

- BD Safety Glide™ Shielding Hypodermic Needle
Becton Dickinson
- BD Safety Glide™ Syringe for Insulin, TB and Allergy
Becton Dickinson
- BD Safety Lok Syringe™
Becton Dickinson
- DonorCare™ Needle Guard
ITL Corporation Pty. Ltd.
- Gettig™ Guard - Safety Needle
Guardian Medical Products, Inc./Gettig Pharmaceutical
Instrument Co.
- Inviro Snap! Safety Syringe
Inviro Medical
- Monoject™ (Magellan) Safety Needle
Kendall Healthcare Products Co.
- Needle-Pro®
Portex, Inc.
- Protector Syringe and Safety Cap System
InjectiMed, Inc.
- Sterimatic Self-Sheathing Syringe
Sterimatic Medical Corp.
- SurGuard™ Safety Allergy Syringe
Terumo Medical Corp.
- SurGuard™ Safety Insulin Syringe
Terumo Medical Corp.
- SurGuard2™ Safety Syringe
Terumo Medical Corp.
- Univec Sliding Sheath
Univec

(B) Retractable needles/syringes

- AUTO-LOCK™ Safety Syringe
ITG-Medical

- BD Integra™ Syringe with Retracting PrecisionGlide Needle
Becton Dickinson
- BakSnap™ Retractable Safety Syringe
DuoProSS
- Elite Safety Syringe
Medi-Hut Co., Inc.
- Futura Safety Syringe
Hypoguard
- NMT Safety Syringe
New Medical Technology, Inc.
- SafePro Safety Syringe
SafePro USA, Inc.
- SafePro Plus Safety Syringe
SafePro USA, Inc.
- Safety 1st® Safety Syringe
Safety 1st Medical, Inc.
- Smartlock Safety Syringe
Advanced Medical Technologies
- Vanish Point Syringe
Retractable Technologies, Inc.

(C) Pre-Filled Syringes

- BD Hypak™ Pre-filled syringe with BD Preventis Automatic
Needle Shielding System
Becton Dickinson
- BD Hypak™ Glass Pre-filled Syringe with BD SafetyGlide™
Needle
Becton Dickinson
- BD PosiFlush™ Pre-filled syringes
Becton Dickinson
- BD Sterifill Plastic Pre-fillable Syringe
Becton Dickinson
- Safety Tip-Lok (prefilled Tip-Lok® syringes packed with BD
